DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on October 7, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application Number 09/635,897 (U.S. Patent 6,568,281) has been reviewed and is NOT accepted.
2. The terminal disclaimer does not comply with 37 CFR 1.321(b) and/or (c) because the application/patent being disclaimed has been improperly identified since the number used to identify the patent being disclaimed is incorrect. The correct number is 6,568,281.

Double Patenting

3. Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,568,281 (Sato et al.). Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the claimed elements in the instant Application is claimed in the Sato et al. patent. Therefore, the instant application is not patentably distinct from the Sato et al. patent.

Response to Amendment

4. Applicant's arguments with respect to claims 1-9 have been considered but are

moot in view of the new ground(s) of rejection.
